The CD playback controller combined with computer includes controller, playback command input device and power supply. The power supply is connected to the controller and the CD drive in the computer and supplies DC source. The playback command input device connected to the controller is used to produce via user's operation CD playback control command transferred to the controller. The controller connected to the CD driver is used to control the playback of the CD in the CD drive based on the command. The present invention makes it possible to playback audio CD without on the computer, and the user can watch relevant information in the display, select music, regulate volume and perform other CD controlling operation via the button panel in the system unit or remote controller.
